

LIONS PARK BURRILL LAKE

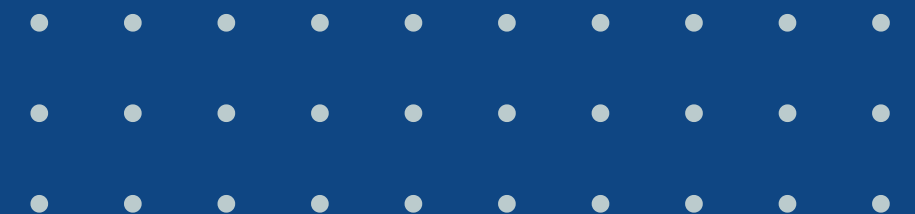

Community-Led Project

HELLO!

“Empowering community through local park development”

CONNECTION

Our vision for the Lions Park is simple: to create a place where everyone feels welcome. A space that brings people together across generations, celebrates our natural surroundings, and reflects the spirit of Burrill Lake.

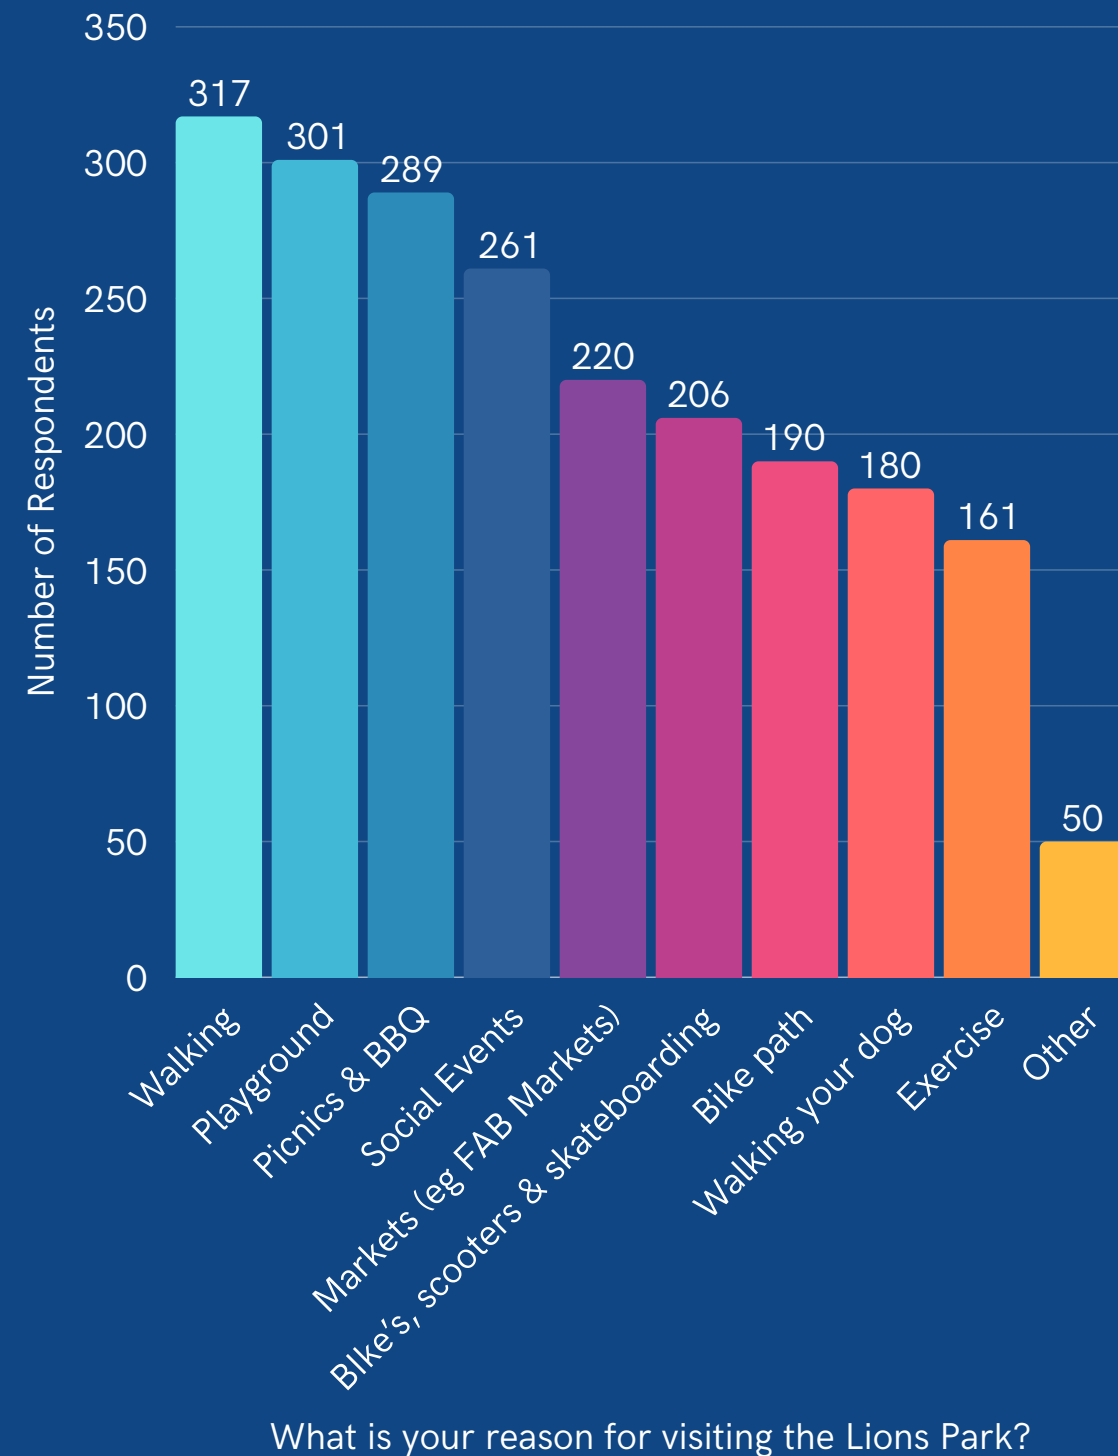

THE COMMUNITY VOICE

We heard from all age groups:
229 young people aged 12–17,
and more than 100 participants
aged 65 and over.

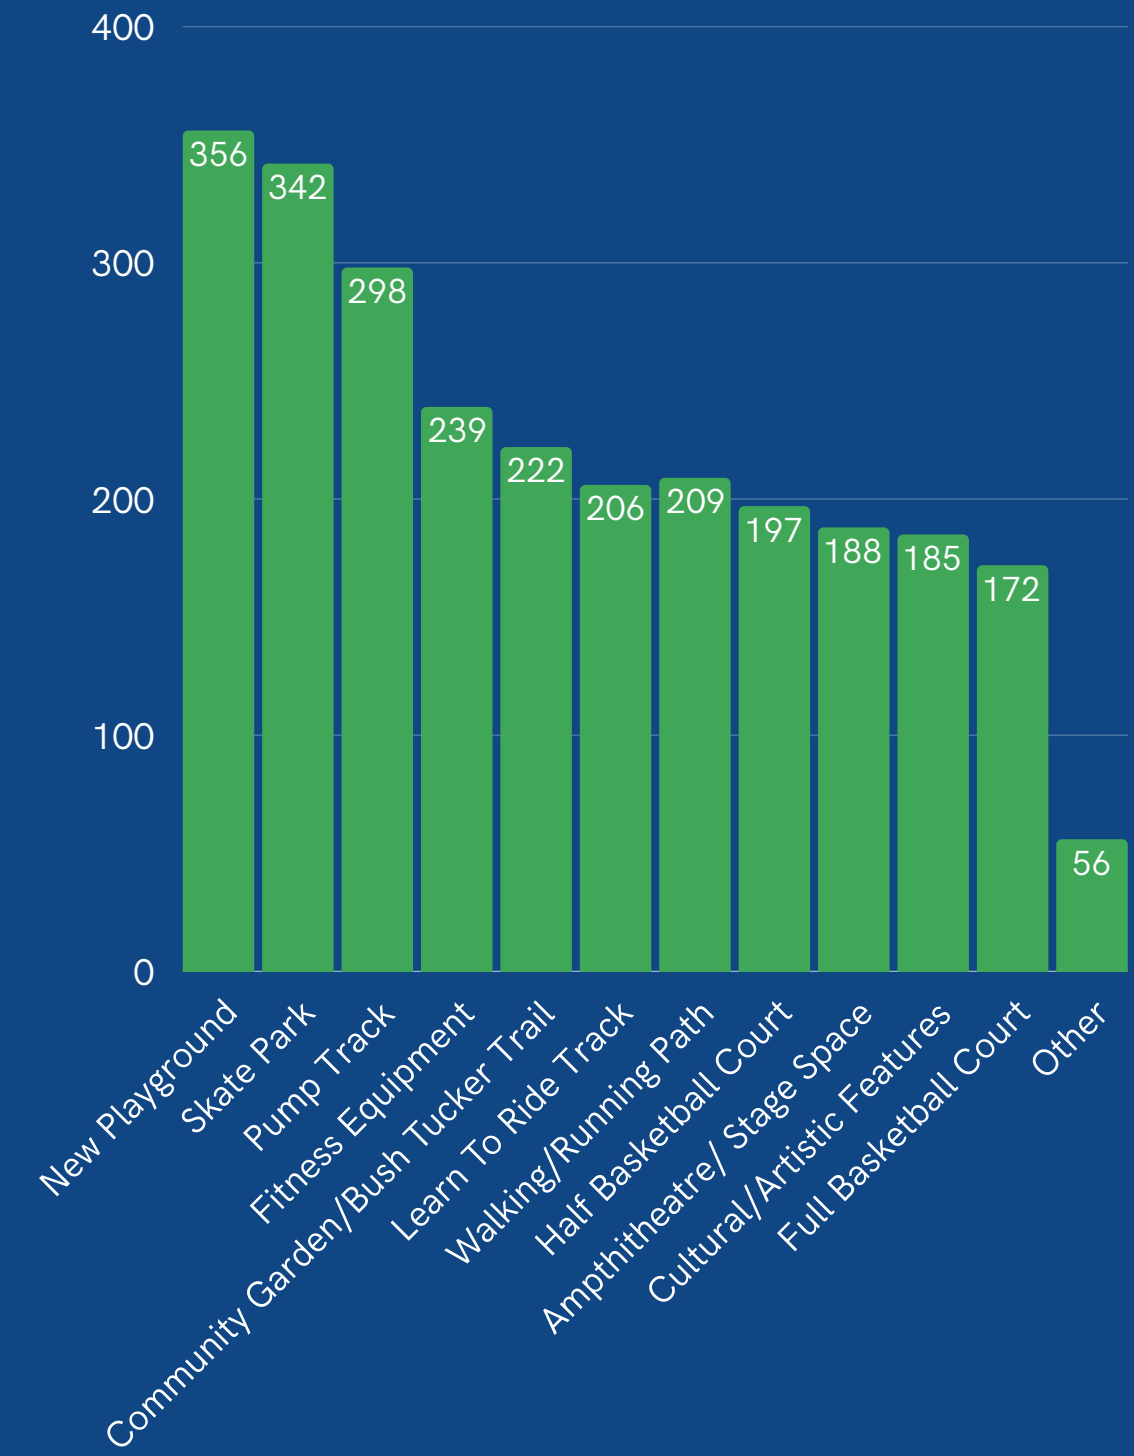

WHAT WE HEARD

REASONS FOR VISITING THE LIONS PARK

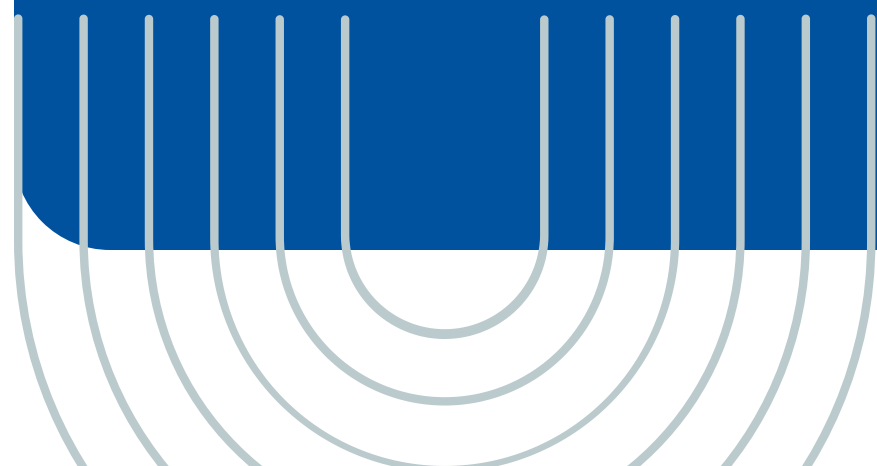

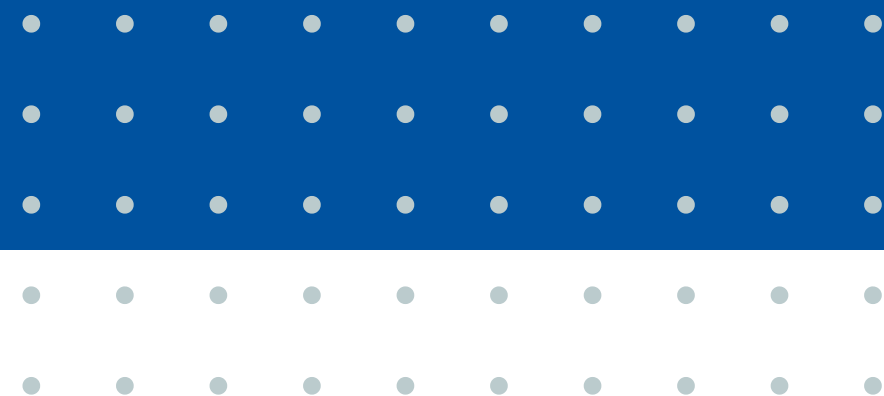

THE COMMUNITY WERE ASKED WHAT THEY WOULD LIKE TO SEE ADDED TO THE LIONS PARK?

LETS PAINT THE PICTURE

The Concept Plan

PLAY BY DESIGN

Play by Design partners with clients and planners to create fun, safe, and challenging play and sport spaces for councils, developers, schools, and childcare centers.

With 20+ years of experience, they offer end-to-end solutions from design to construction. As exclusive agents in NSW and ACT, they represent global leaders like Kompan.

PROJECT DESIGNER

Convic creates communities. As one of the global leaders in skate park and youth space solutions, Convic has created more than 800 action sport facilities around the world.

Successfully partnering with governments and developers around the world, Convic has developed a global reputation for innovation and quality, building a wealth of national and international knowledge and experience in the process.

Dirtz. specialises in designing and building off-road cycling facilities, with over 120 projects completed across Australia, New Zealand, and Asia. Our reputation is built on word-of-mouth, thanks to our passionate team of accomplished cyclists, including director Brett Barnes—Australia's most experienced off-road track designer.

Our staff, including nationally and internationally ranked machine operators, ensure every design is both functional and visually appealing. From backyard pumptracks to Olympic-level BMX tracks, we live and breathe cycling and active travel. We take pride in creating joyful community spaces and continue to raise the bar for cycling facilities across the southern hemisphere.

Playground

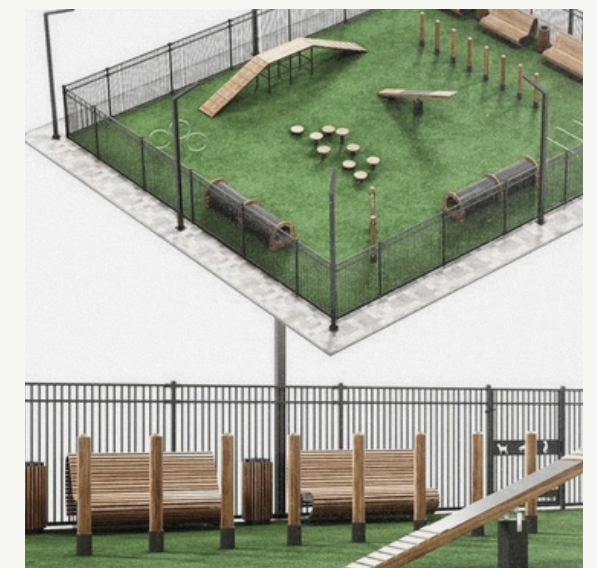

We want to create a playground that truly brings everyone together. For the little ones, there'll be nature play, a flying fox, and slides. For older kids, exciting features like a climbing structure and a bouldering wall. This means families can stay and play side by side. And it's not just for kids - grandparents, friends, and carers will have comfortable spaces to sit, relax, and join in the fun. It's about creating a place where every generation feels welcome & connected.

Skate Park

A well-designed skate park will create an active, social space for young people and families. It will cater to beginners and intermediate riders, offering safe progression in a visible, positive setting. The street-style design, which is different from Ulladulla's skate park, will include native vegetation, shade, seating, and viewing areas. It will provide a unique experience that encourages community connection and healthy outdoor activity.

Dog Off-Leash Area

Dogs are central to local life in the Southern Shoalhaven. The fenced dog area will encourage responsible recreation, social connection and protection of the lake edge. Design features include a double-gate entry, separate zones for small and large dogs, shaded seating, accessible paths and interpretive signage. By directing dog use to a dedicated space, the facility will reduce uncontrolled access to sensitive foreshore habitats and improve safety for all park users.

Pump Track

A flowing, all-ages pump track where kids, teens, and even adults can ride and roll through a fun, sculpted circuit that builds skill, confidence, and that feeling of freedom

Learn-to-Ride Circuit

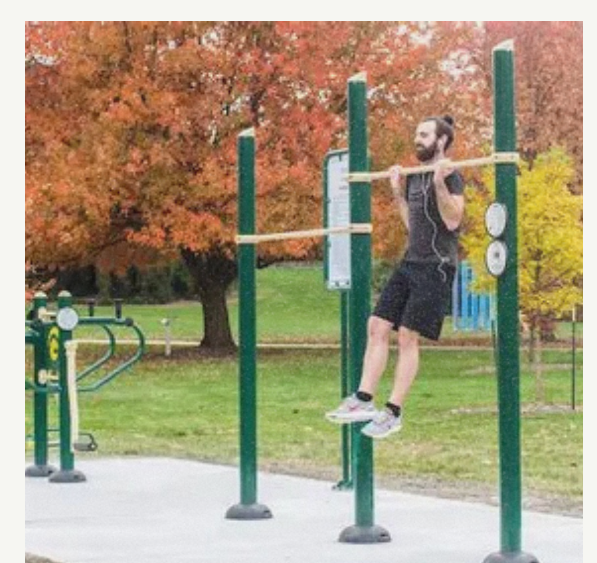

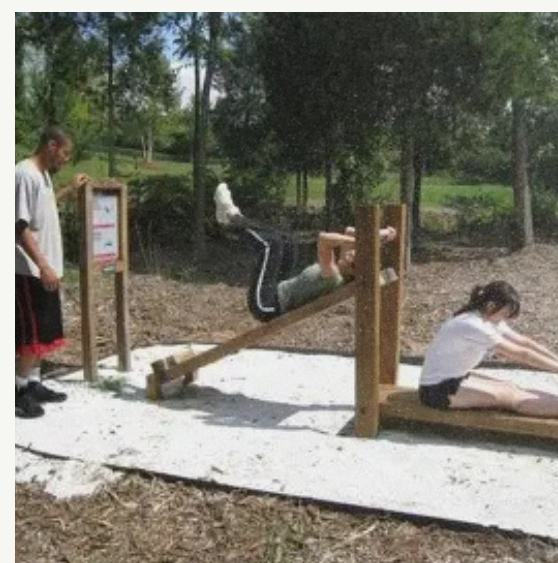

A safe, miniature road network where little riders can build confidence and learn essential road skills. Featuring stop signs, traffic lights, pedestrian crossings, and more, it creates a fun and secure space for kids to experience the joy of independence while learning how to ride safely

Amphitheatre

A grassed amphitheatre with a stage will provide a flexible space for community performances, school assemblies, and outdoor education. Designed to be low-impact and integrated into the landscape, it's a place for memorable moments - imagine music on a summer evening, a Christmas concert where everyone can see the stage, or snuggling under a blanket on a clear winter night listening to your favorite local artists.

Outdoor Fitness Trail

Spaced out fitness stations along a circuit encourage children, adults and seniors to engage in active recreation and connect. It lets you walk, stretch, or exercise at your own pace. Stations will include equipment for body-weight exercises and low impact machines with clear instructions and accessible spacing.

Bush Tucker Trail and Community Garden

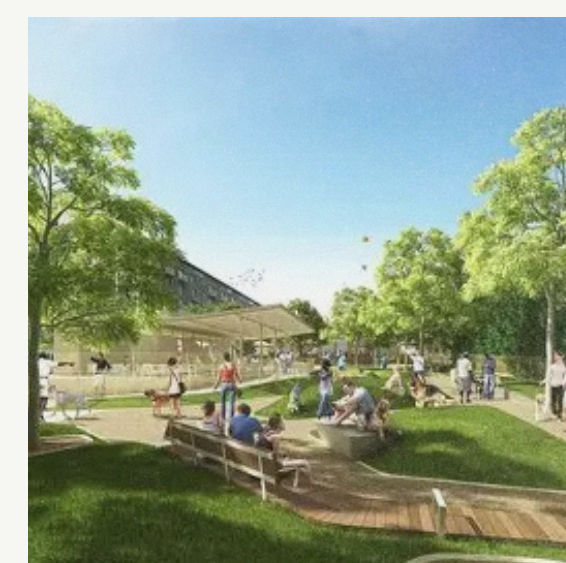

A Bush Tucker Trail will invite visitors to slow down and connect with local stories, native plants and cultural knowledge. Along the way, interpretive signs will share the traditional uses of plants and the importance of caring for Country. Beside the trail, a small community garden will offer hands-on opportunities for growing, learning and sharing food - fostering intergenerational connections, environmental awareness and a true sense of belonging. Together, they'll create a sensory experience that engages sight, touch, scent and story.

Storage Facility with a Beachside Toilet and Shower Block

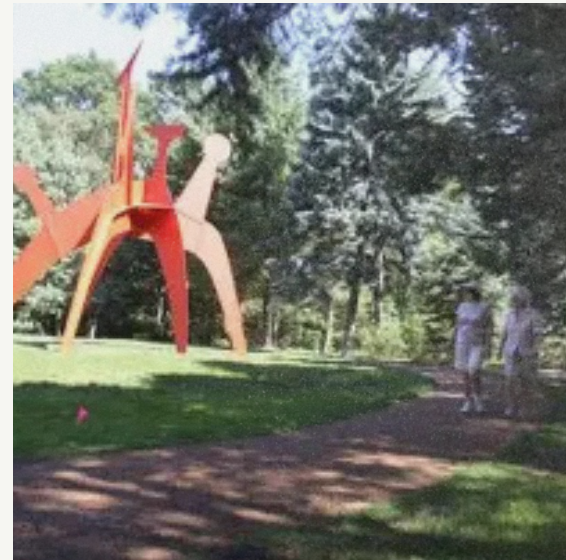

A low-impact storage facility will support the park's connection to the lake and water-based recreation. Designed for community groups to use with easy access to the foreshore. A new, accessible amenities block incorporated into the storage facility on the beachside will provide modern toilets, showers and change facilities. The building will be sensitively integrated into the landscape using coastal materials and colours that complement its surroundings.

Village Green and Market Space

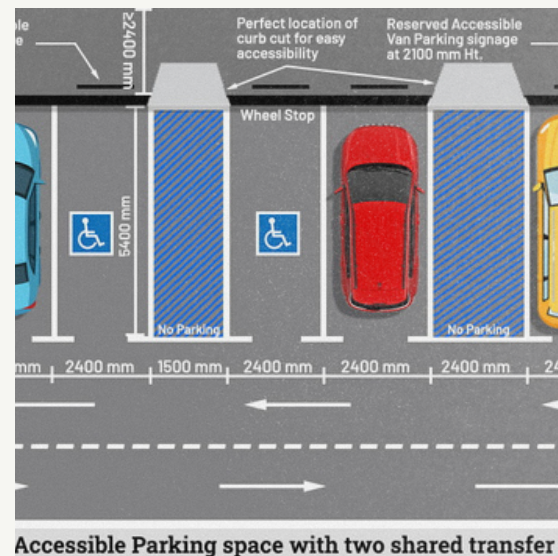

A flexible open lawn/ village green near the park entry will host local markets (like the FAB markets), community gatherings and seasonal events. Power and service access points will be considered to support market operations while maintaining the open character of the space.

Sculpture Walk and Local Storytelling

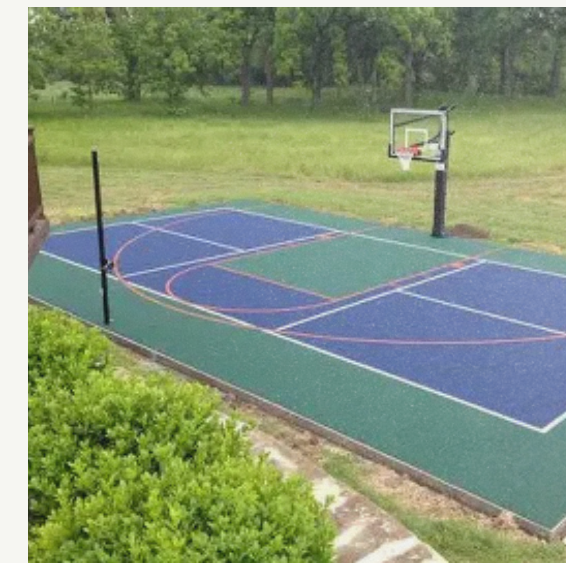

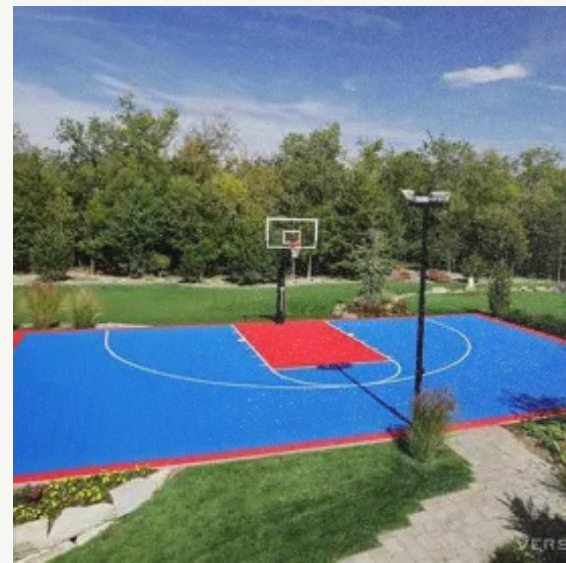

A curated art and storytelling trail around the park will celebrate the unique spirit of Burrill Lake through sculptures, mosaics and interpretive features created by local artists, schools and community groups. The walk will honour the region's stories of connection, resilience and renewal.

Improved Car Parking and Access

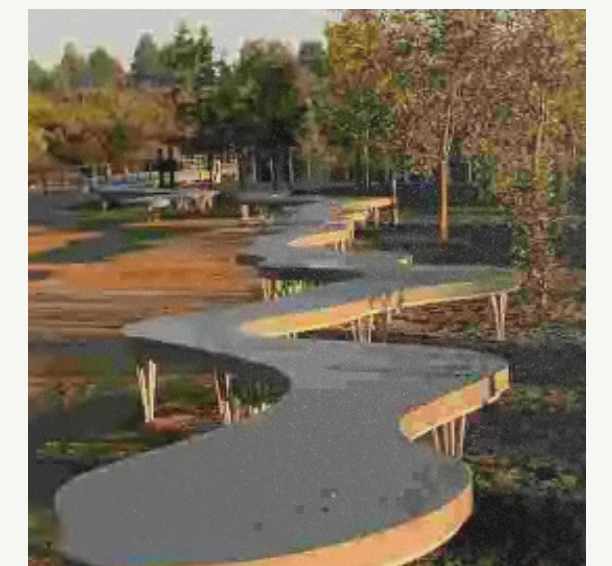

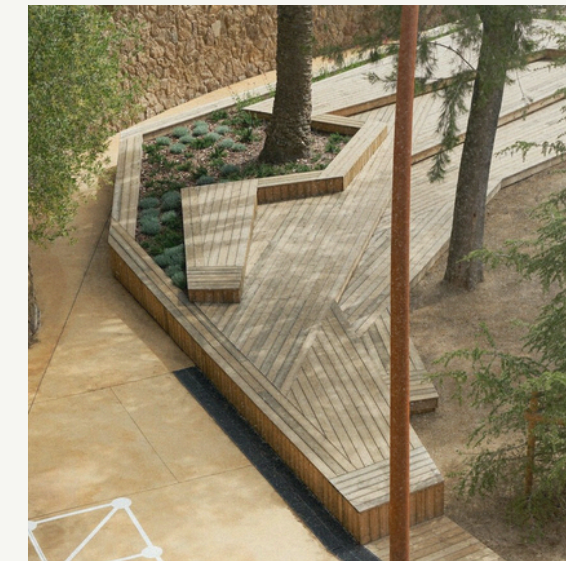

Upgraded car parking and circulation areas on both sides of the Lions Park will enhance access, safety and overall visitor experience. The design will include clearly defined parking bays on both sides of the street, accessible spaces, safe pedestrian linkages and improved surfacing.

Multipurpose court

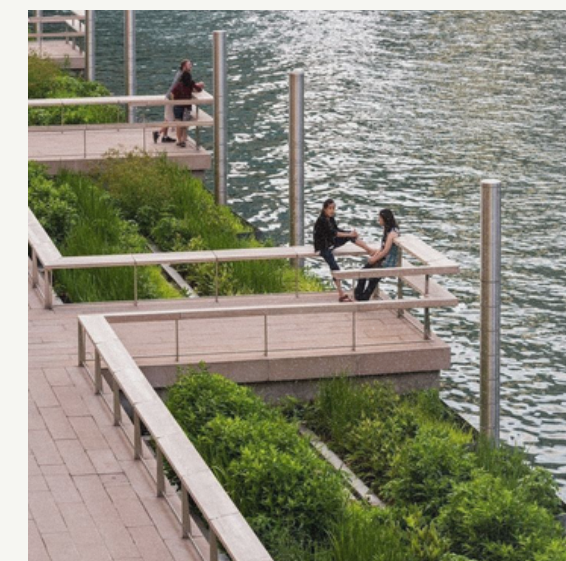

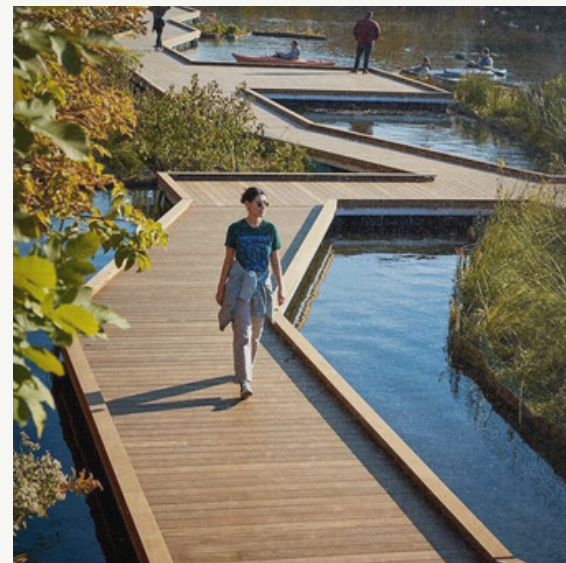

A versatile court will provide opportunities for basketball, netball, pickleball and informal play, encouraging active recreation for all ages. The court will include line markings for multiple sports, adjustable hoops and surrounding seating for spectators. Integrated lighting and nearby shade areas will support both daytime and early evening use, creating a lively, social space for families, youth and community gatherings.

The Moreton Bay Fig Tree Gathering Circle

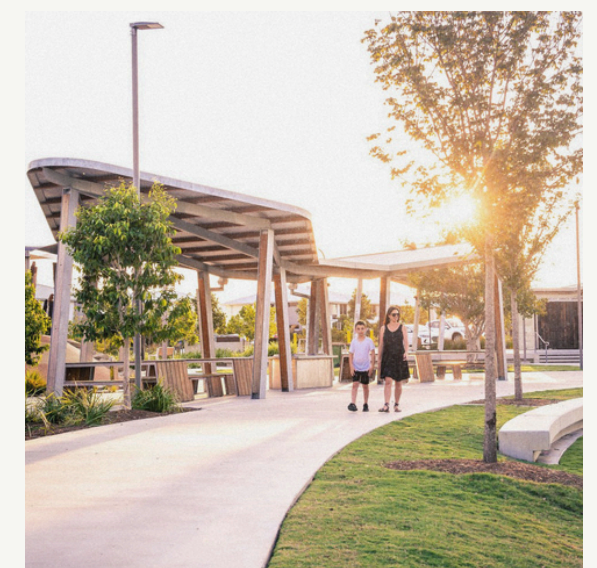

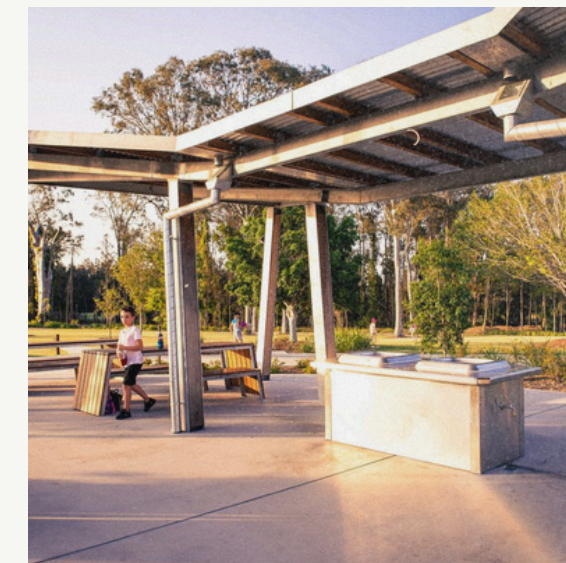

At the heart of the Lions park stands the majestic old fig tree. This beloved tree has shaded generations of families, hosted countless picnics and witnessed weddings, farewells and reunions beneath its broad canopy. To protect its roots and ensure its longevity, the design introduces seating that gently embraces the tree without intruding on its growth.

Lakeside Boardwalk with Fishing Jetties

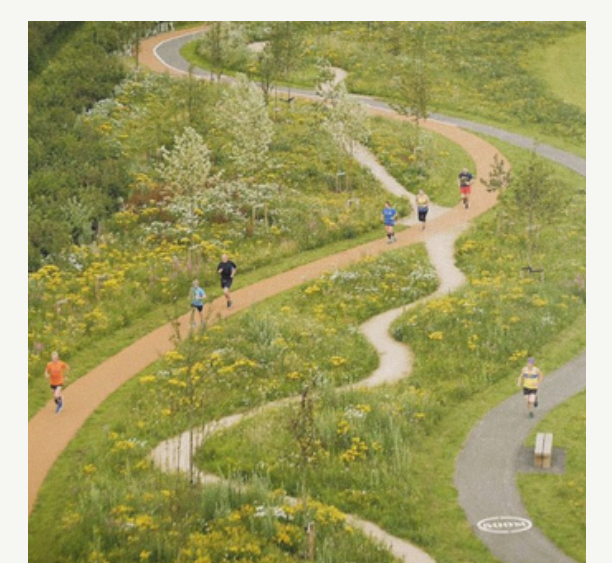

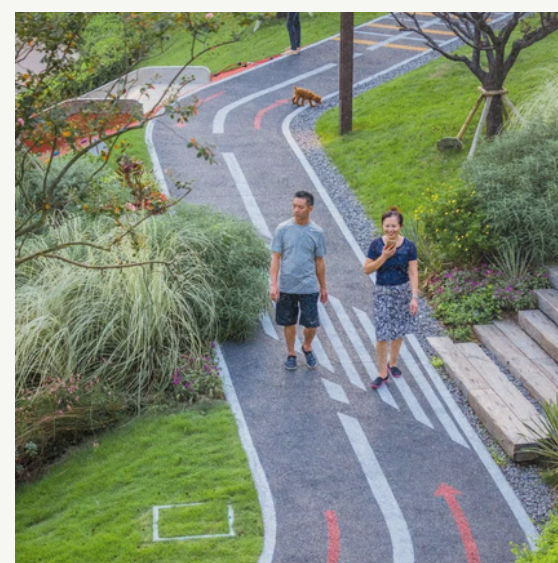

Stretching along the waters edge, the new Lake Boardwalk will invite locals, visitors and people of all abilities to experience Burrill Lake up close - to stroll, fish and take in the beauty of the shoreline. Designed with natural materials and gentle curves that follow the lake's contour while protecting sensitive foreshore vegetation. Along the way, new fishing jetties will extend over the water, offering safe, accessible spots for families to drop a line, teach children to fish or simply sit and watch the lake.

Beachside Shelter

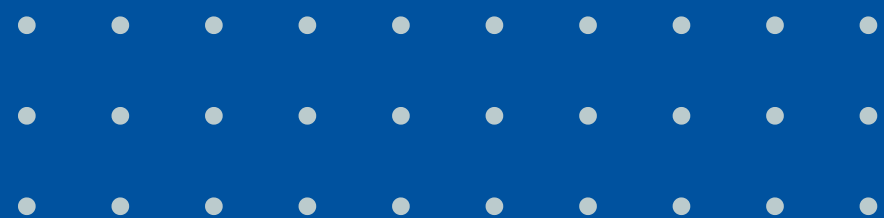

A new shelter on the beach side of the park will provide a comfortable, shaded space for visitors including tour and bus groups to sit, eat, and enjoy the lake views. Designed in a similar welcoming style as the shelter near the park entry, it offers a practical spot for rest stops, community gatherings, and picnics by the water.

Park Run and Shared Accessible Path Network

The new shared path network will link every corner of the Lions Park in one continuous 1km loop. It's designed for walkers, runners, cyclists, prams, mobility scooters and wheelchairs alike. Even better, it creates the perfect 5-kilometre circuit to accommodate a Parkrun course allowing Burrill Lake to host its own regular Parkrun events - a global initiative that brings communities together every Saturday morning.

**“THIS CONCEPT CELEBRATES THE PARK’S
OPEN SPACES AND TREES - WE’RE
COMMITTED TO PRESERVING THEM
WHILE INTRODUCING THOUGHTFUL
IMPROVEMENTS THAT INVITE MORE
PEOPLE TO CONNECT WITH THE PARK.”**
